

**November 18, 2020 Planning Commission Meeting**  
**Addendum to Staff Report for Provident Electric, AP 19964**

Although Note 14 on the site plan stated that the architectural elevations were reviewed and approved by the County, the Planning Commission expressed concern that the historic review of the storage building architectural elevations in accordance with the National Road Historic Guidelines review was not discussed in the Staff Report. This addendum is to confirm that the architectural drawings (shown on sheet 3 of the site plan) were reviewed by the County Historic Preservation Planner and found to meet the intent of the guidelines.
