

To: Frederick County Council
From: Sue Trainor
Date: 8/11/22

I'm writing to ask for your support of the Sugarloaf Treasured Landscape Management Plan with its full boundary and Overlay from the Montgomery County line, along I-270, to the Monocacy Battlefield and without the newly added "amendments" wiggle room. Many of us have lived and worked here with the understanding that I-270 has been the boundary between dense development on the east side and rural on the west. The Planning Commission supported that Plan boundary.

Here's one specific reason I support the Plan. I'm including a photo I took from Park Mills Road, just west of I-270. It's a lovely view of Sugarloaf Mountain, looking across acreage that I believe is part of what Mr. Natelli refers to in his comments as his "interchange properties."

As I understand it, no interchanges appear in official planning documents through 2045 or so. Again, as I understand it, that is beyond the expected life of these macro land use plans so I'm not sure why this interchange argument is even on the table. Nonetheless, Mr. Natelli speculated on property, he wants a big win, and we will suffer the consequences if he does. I don't think he wants to farm; perhaps he has his head in the (data) "cloud." A data center (or a McDonalds) across from the end of my driveway is not what I moved here to experience. Why should one property owner's "rights" include destroying the value to me of my property?

There is plenty of land in Frederick County already designated for dense development. THIS is treasured landscape, by so many metrics. Please preserve it by voting for the Sugarloaf Plan.

Respectfully submitted,

Sue Trainor

Sugarloaf plan is a poor idea please go back to the drawing board and fix it. Thank you, Dean Geis.

August 11, 2022

To: Frederick County Council

From: Blanca Poteat, Sugarloaf Mountain Road

Re: **Sugarloaf Treasured Landscape Management Plan**

Thanks to the County planning staff who have developed the Sugarloaf Plan, guided by the area's natural attributes and resources, and who continue to work with residents and others to clarify and refine the Plan to achieve its preservation goals.

I urge the County Council to:

1. Support the Plan's boundaries from the Montgomery County line to the Monocacy River, as recommended by the Planning Commission. This action, affecting less than five percent of Frederick County, will leverage and expand the region's protected forests and open space with the adjacent 93,000 acre Montgomery County Agricultural Reserve and the 1,647 acre Monocacy National Battlefield park.

2. Support the Plan's preservation goals. This is not a development plan. The I270 corridor is the historic boundary between infrastructure and development on the east side and rural communities, farmlands, woodlands and waterways on the west side. These west side resources are essential for the County's climate change mitigation and adjustment efforts.

3. Respect the Sugarloaf area's local history which is important, not as nostalgia for imaginary "good old days," but as guidance for continuing to balance human land uses with natural features and resources.

4. Apply the Rural Heritage Overlay Zoning District to the entire Plan area. Existing commercial enterprises will be able to continue current activities.

5. Remove the expansion of commercial zoning near the I270 interchange. The crossroad of Route 80 and Thurston Road is the County's main gateway to the Sugarloaf region and should be protected as such.

And finally,

6. Remove the text change on page 54 of the Plan. The last paragraph in the Urbana Community Growth Area section exposes the Plan to short term changes favorable to development and inconsistent with the Plan's preservation goals.

Thank you.

[EXTERNAL EMAIL]

Hello,

I have written in the past many times to let you know that I support the use of I-270 to delineate between developed zones on the east side and protected zones on the west.

I am concerned about the statement on page 54 which states, "...*The scale and scope of future planning for the Urbana Community Growth Area or the I-270 corridor may determine the degree and extent of lands within the Sugarloaf Planning Area, if any, and may result in a limited plan amendment to the Sugarloaf Treasured Landscape Management Plan."

This sounds like the plan is stating that the plan as it stands, can be changed, or limited, to allow for development detrimental to the protected nature of this area.

I thought the point of this plan was to set protections to this area for future generations to enjoy. If this statement is meant to allow changes to the zoning of the regions west of I-270 to allow for development, then why are we going through the motions of putting together a plan to protect this area?

If I am not understanding this statement, can someone please explain it to me? Perhaps I am confused?

Thank you, Margy Simpson

I'm Nick Carrera; 2602 Thurston Road, Frederick 21704

There is widespread support for the Sugarloaf Plan, despite the tone of the article in the Frederick News-Post. We supporters are sometimes drowned out by a few persons who want favorable treatment. And especially loud is the well-financed group that wants the freedom to buy, sell, and develop property just as they please. Having no Plan at all would suit them just fine.

Fair treatment has been a problem. The March 2021 draft Plan was pulled back suddenly and then released in July with a big change favoring an influential developer. The Planning Commission undid that change, but there are still pressures for special treatment. Resisting those pressures will keep the Plan true to its goals.

An example of fair treatment is using objective criteria for proposed changes from "agricultural" zoning to "resource conservation." Planning staff looked at the actual physical condition of properties, at features such as water courses, flood plains, and steep slopes. Does anyone plant crops in such areas? Or plan to build houses there? Already it's either infeasible or illegal. The physical nature of the land precludes these uses, and the rezoning simply confirms that.

Regarding unfair treatment, an example is drawing the Overlay to exclude three properties whose owners requested it. The weak justification is the fond hope that a mass-transit system will soon be built along the east side of I-270. I suggest you don't hurry to buy your tickets to ride on it. It'll be a long time in coming, and if it does come, we'll have a better idea then what accommodation will be needed for a train or a bus station. In meantime, the Potomac Garden Center, the Kannavis Dispensary, and the Greenbriar pet hospital can be fully included in the Overlay, and be treated like everyone else. They won't even have to change their current operations.

Finally, a plea for openness and transparency. There has already been too much dealing under-the-table. It's not fair and it's not worthy of us as a county.

Comments on Sugarloaf Treasured Landscape Management Plan. August 11, 2022.

My name is Steve Poteat and I live on Sugarloaf Mountain Road. Our family has lived on this area for over 70 years and on this property for over 50 years. I have been an active member of the Stakeholders Group for over 2 years. I wish all members of the Stakeholders Group had participated more actively. Without their active participation I am concerned that they literally “do not see the forest for the trees.” **I support this Plan. I do have concerns about four issues.** But, first and foremost, let’s remember the Sugarloaf Treasured Landscape Management Plan is part of the Green Infrastructure of the Livable Frederick Master Plan. It is a preservation Plan not a development Plan.

Concern 1: Transportation Realities. My main objection is the discussion of transportation issues on page 54 and in Chapter 5. The Plan suggests development in the near future on the west side of I-270 based on road and transit improvements that have little likelihood of taking place in the foreseeable future. Such improvements may never be justified in light of changing financial, employment and climate conditions. In fact, last week the Federal Highway Administration halted in the Maryland Governor’s Opportunity Lanes project to take a closer look at the environmental impact study. Support for this project seems tenuous. Clearly the Opportunity Lanes effort is a 20th century solution to a 21st century problem.

Previous versions of the Sugarloaf Plan discussed transit oriented development in Urbana. But with no transit there can be no transit oriented development. The likely failure of the privately-financed Maryland Opportunity Lanes project which is focused on the Washington Metropolitan Area will support Frederick’s home grown economic development, especially

with the changes taking place in work places and commuting patterns as more people work from home. For those requiring a commute to the Washington area, expansion of the MARC commuter rail system, supported by governments in the Metropolitan region, will address this need.

Concern 2: Market Demands The developer pushing for development on the west side of I-270 is the same developer who had rezoned 250 acres of employment land to residential land on the east side of I-270 citing a lack of demand. This took 4 million square feet of employment development away from Urbana, the equivalent of 40 one hundred thousand square foot buildings. Now the developer of the Knowledge Farms employment center is trying to do the same. Why does the County need employment land on the west side of I-270 if developers cannot market the employment land already on the east side?

Concern 3: Support the Overlay Zone. One critical purpose for the Overlay zone in addition to protecting unique and essential environmental resources is to prohibit destructive uses. These include gun firing ranges and rubble fills that are completely inconsistent with the Sugarloaf region and cannot be prohibited any other way. In addition expansion of the additional commercial zoning on the west side of I-270 is inappropriate and will result in a major commercial complex that will encourage more development in the Sugarloaf area.

Concern 4: Forest Protection. A note for those who say our forests do not need additional protection. We personally have done everything the State and County have required during three harvest cuts over the last 40 years: Forestry Management Plans, use of a registered forester, sediment control plans, and prereview of the logging operations by the Forestry Board. But

it all gets down to who signs the contract to harvest the trees. The Forestry Board has never done a post-harvest inspection. The increasing level of woodland damage has become unacceptable. If Frederick County truly wants to promote and protect its forest lands, our experience suggests that stricter regulations and inspections are needed.

Thank you for considering my comments. Please preserve and protect the Sugarloaf region.

Sugarloaf Treasured Landscape Management Plan

Comments to County Council

08/11/2022

My husband and I have lived on a ~119 acre historic farm on Peters Road since 1980. The property consists of open fields and forested areas with Bennet Creek flowing through it. We have worked to protect and enhance the historical and natural aspects of the property, putting portions of the farm into the Conservation Reserve Program.

We both appreciate the county staff efforts that have gone into this plan and strongly support it in concept, but feel the following areas need to be addressed for a successful outcome.

1. It is important to maintain the boundaries outlined by the Montgomery County Line, the Monocacy River and the Monocacy National Battlefield Park, as previously recommended, to protect the area and the Rural Heritages overlay zoning should be applied over the entire area.
2. Any recent expansion of commercial zoning on the west side of 270 should be removed and any future expansion halted, but allow commercial operations already in place to continue their current businesses. This would include areas around the I270 interchange and the Route 80 / Park Mills Road crossroads.
3. The recent text change on page 54 of the plan needs to be removed as it opens the plan to be revised in a very short period of time, which could favor development over protection and preservation efforts.
4. The Overlay Zone also needs to be supported to prevent land uses inconsistent with the goals of the plan.
5. The preservation goals of the plan need to be fully supported – If not now, when? The opportunity is NOW..

Thank you
Karla & Bill Stoner

Kristen Morrison
1820 Mt Ephraim Road
Adamstown, MD 21710

Dear Council Members,

I drove home today by taking the back roads from Montgomery County. I took 355 North until Rockville Pike became Frederick Road and turned left on Comus Road and then right on Mt Ephraim Road. Its a beautiful day and the scenic countryside views of rolling hills and Sugarloaf Mt where spectacular. Driving over Mt Ephraim's gravel road through the cool forest was soothing on such a hot summer day. These vistas humbly reminded me that we people who live in Frederick County have a duty to keep this kind of beauty protected in Frederick County. If we don't preserve the rural character that is proposed in the Sugarloaf Draft Plan area west of I-270, then it will soon be gone. Just as it is now gone where 355 becomes Urbana Pike. I support the Sugarloaf preservation plan.

Sincerely,
Kristen Morrison

Subject: Sugarloaf Plan Comment

[EXTERNAL EMAIL]

Hi there! I wrote in a few weeks back to express my support of the Sugarloaf Plan. I want to reiterate how valuable I think it will be to our community to preserve Sugarloaf's natural beauty and protect its wildlife. Frederick County already has many rapidly developing areas, and we need to keep some of those rural areas undeveloped lest we lose the features that attract people to Frederick in the first place.

In addition to my previous support of the plan, I wanted to express some concern about the following addition on page 54: "The scale and scope of future planning for the Urbana Community Growth Area or the I-270 corridor may determine the degree and extent of lands within the Sugarloaf Planning Area, if any, and may result in a limited plan amendment to the Sugarloaf Treasured Landscape Management Plan." I'm concerned that it weakens the plan's goal of protecting this area and its wildlife. I hope you'll reconsider and remove this statement.

Thank you for the time and effort you have put into considering the Sugarloaf Plan. I remain impressed by the folks who crafted and reviewed this plan with such care.

Sincerely,
Theresa

Thank you,

Johanna Springston
8101 Fingerboard Rd.
Frederick, MD 21704

My name is Johanna Springston and I live at 8101 Fingerboard Rd. My husband and I own a farm that starts at the corner of Fingerboard and Parks Mill Rd. This farm was started by my grandparents one hundred years ago.

- I want to voice my support for the Sugarloaf Plan as a **preservation** plan that is sorely needed in southern Frederick County.
- I think the current boundaries of the Plan are correct and that you should retain those boundaries.
- I would like to see the **preservation** overlay apply to the entire Plan area, including the businesses at the Rt.80/270 interchange. All of these businesses can continue to operate as they currently are within the overlay.
- I would like you to reconsider the rezoning of the Potomac Garden Center. Adding additional commercial zoning to the Plan area contradicts a major goal of this Plan: **preservation** of the Sugarloaf area. If approved, the property owner will then have close to 20 acres of commercial property that could be sold and developed into a commercial enterprise that is not compatible with the **preservation** goals of the Sugarloaf Plan.
- I would like the language that is on p. 54 of the plan that allows for the Sugarloaf Plan to be amended when the I-270 corridor plan is under review to be deleted. If such action occurs, all the hard work of creating this **preservation** plan will be destroyed. I want to be able to trust that this is a long-term plan focused on **preservation**.
- Finally, I want to share my concern that this plan is not being developed in a transparent manner. I think every citizen of Frederick County who wishes to participate in the development of this Plan should have an equal opportunity to be heard.
- It is now coming to light that the developer who owns farm land in the Sugarloaf area (some of it right across the road from me) may have had undue influence on the State Department of Commerce's comments which support, not **preservation**, but development in the Plan area.
- It remains to be seen what, if any, influence he has had behind the scenes on Frederick County officials.

- I may be naïve, but it is my expectation, that Frederick County has a fair and open land use planning process.
- I urge the County Council to restore the public's trust in the process through their review and adoption of a Sugarloaf Plan that is truly focused on **preservation**.

Message Transcription: My name is Ellen Gordon. I've lived in Montgomery, county's agricultural reserve for 34 years. Our property is about a half mile from the border with Frederick county, and we have a clear view across forests and farm fields to Sugarloaf mountain. As we hike the mountain frequently, we often see the numbers of people from the region that also enjoy its trails and the views into both counties. Since I do most of my shopping in the town of

Frederick, I get to appreciate driving through the planning area that is west of I two 70, some of which might receive dense development. If you allow the change in boundary to occur threatening farms and rural homesteads, I strongly support the plans. I two 70 boundary from Montgomery county to the monos. I also support the plan's preservation goals for the Sugarloaf area. I oppose a specific paragraph you're considering on page 54, which looks like it was added at the last minute, without an opportunity for public comment. It says the scale and scope of future planning for the Urbana community growth area or the I two 70 quarter may determine the degree and extent of lands within the Sugarloaf planning area, if any, and may result in a limited plan amendment to the Sugarloaf treasured landscape management plan. This appears to create an explicit opportunity for developers to quickly push for plan changes. And this, despite more than two years of work and public input on the current version, sadly, I believe that proponents of these changes are using scare tactics to gain support. I've seen some printed signs on my drives to Frederick that state, that this fight is about protecting property, right? So that owners don't experience a decrease in the value of their land. The truth is the zoning changes from a change from ag to RC in the rural heritage overlay zone is just for stream margins with steep sides and trees or, or trees areas that aren't tillable and aren't buildable. It's a better descriptor of the land and it's not going to impact the value of properties. Thank you.

Message Transcription: My name is Elizabeth law, and I live at 1758 Wayfield drive in Frederick, Maryland. Thank you for the opportunity to speak in support of the treasured, the Sugarloaf treasured landscape plan. Two aspects of the plan are crucial for inclusion. The plan's I two 70 boundary from Montgomery county to the Monsey river and the application of the Sugarloaf rural heritage overlay zoning district to protect the entire area of the plan. However, recently included language on page 54 of the plan should be removed since the vague language provides a loophole for developers to drive their construction equipment through the language includes quote the scale and scope of future planning for the Urbana community growth area or the I two 70 corridor may result in a limited plan amendment of the Sugarloaf treasured management plan. I question, where are the terms, Urbana community growth area, and I two 70 corridor defined. What are the specifics of a quote unquote limited plan amendment allowing commercial and industrial development. On the west side of I two 70 would establish a change in the character of the area leading to justification for further expansion, permanent destruction of existing agricultural and natural areas and wire enforced resources would resolve of special concern given climate change. And the intense development in Frederick county is maintaining water quality industrialization and dense housing development will Contin will contribute in permeable services and multiple pollutants and contribute to flooding. However, there is a solution. The next master plan is the south Frederick S plan. Why not invite the developers to work with stakeholders, to provide housing and commercial opportunities in the south Frederick corridor instead of Sugarloaf, the Sugarloaf area is unique and precious and is emblematic of why Frederick county is livable to fail, to protect this treasure from encroaching development would be to invalidate what livable Frederick hopes to achieve. Thank you.

Message Transcription: Hello. My name is Penelope McCray. I'm calling in support of the Sugarloaf, the, the front, the Sugarloaf area. That's going to be preserved. I've owned property there since 1990. And I have seen how the area to the east of two 70 has been developed over the years into this high density area, which is now urban. But I remember back in the nineties when there was very little there. So I think it's very important that we preserve the rural character on the west side of two 70. I find that the, the boundary lines, which are so easily defined with Montgomery county lines and Frederick county line and two 70 and the Mony river, they're very easily defined, defining this area. And I think that's

very important. I don't think you should allow any cutouts or jigsaw parcels to be excluded in this area. The rural area is important, and if we can keep it rural, you know, someday this is gonna be as important as the, the, the mall in DC, just to have some area with some green space. So please, please support this property, the boundary, and preserve this area of Sugarloaf mountain. Thank you.

To whom it may concern;

My name is Gabe Lawson. My wife (Rose) and I own the farm located at the road closure at the end of Monocacy Bottom Road. We have been the proud owners of this unique property for approximately 20 years. We purchased it due to its extensive Monocacy River and Bennetts Creek frontages as well as its beautiful views of Sugarloaf Mountain. It is also very productive crop land. A large portion of this property is located in floodplain, so it is not reasonable to utilize that land for anything other than crops. We are quite concerned that, yet again, Frederick County is trying to "grab" our precious land and control it. We have been good stewards of this property and would never do anything that would harm it. Actually, we have continuously taken actions to enhance its value.

This property is also on a very narrow dead end road. With this restriction and given the amount of flood plain, this property is not reasonable to develop.

Obviously, "down zoning" would decrease its value and restrict the uses that are now available to us, most, if not all of which, would have to navigate the permit process, anyway.

Due to the above, we strongly oppose the Sugarloaf Treasured Landscape Management Plan for this property. There is absolutely no reason or advantage for you to down zone and / or control this particular tract of land. Therefore, we respectfully request that this property be removed from the +/- 22,000 acre Sugarloaf area that is being considered for the above mentioned Plan action.

Please feel free to contact me for further discussion at 301-788-7900.

Respectfully submitted,

Gabe Lawson

Message Transcription: My name is Stan Mordenski 11401 meadowlark drive, Ijamsville, Maryland 21754. I strongly support the preservation of the Sugarloaf plan boundaries from I two 70 to the Monsey river. The highly valued livable Frederick plan supports the preservation of natural and historic areas. Preserving the Sugarloaf plan is a healthy choice on the mind, body and soul of our Frederick county citizens and our visitors. I do not know of anyone who takes a Sunday drive to see development a long route 3 55, but many of us take a Sunday, drive out into the country to see natural areas and open space. People need natural settings and open space to nurture that mind, body, and soul. Please consider that the Sugarloaf area does much more than what different health professionals do just by going for a ride, going for a hike or taking in the beauty from some scenic location that once we alter this area, it will never be the same. We need to preserve. Thank you very much for your time.

Message Transcription: This is Barbara lexing. We think the text on page 54, providing for limited planned amendment is not the innocuous verbiage. It purports to be. It opens the door for urban sprawl, which undermines the entirety of the Sugarloaf sugar loaf. Mountain is the most notable gift for mother nature in Southern Frederick county and should be protected, which also means preserving the surrounding land influenced by the mountain rainfall, wildlife and tree propagation. Don't start and end at the mountain. Those gifts from mother nature extend far out into the surrounding area. So to save the mountain is to save the surrounding land overall eliminate any such amendment allowing for land development and urban sprawl on this side of two 70, hold the line at two.

Subject: Sugarloaf Preservation Plan

[EXTERNAL EMAIL]

Dear County Council Members,

Hi, my name is Pandora Gunsallus and I own about 25 acres of farmland, 13 acres being farmed and the remainder is wooded. My parcel sits near the corner of Rt. 80 and Parks Mill Rd. with a nice view of Sugarloaf Mountain. My farm is part of a larger original farm that was 366 acres, bought by my grandparents, at present about 110 years ago. It operated as a dairy farm. The address is 3350 Parks Mill Road. My parcel sits behind and abuts the farm owned by Johanna Springston, which is directly across the road (Rt. 80) from the large tract of farmland owned by Tom Natelli.

I have been focusing on this preservation issue since about October 2020, when I wrote a letter in support of maintaining Hope Hill as a whole and not bisecting that community for development.

I am writing today in support of the current Sugarloaf Plans I270 boundary remaining from the Montgomery county line to the Monocacy River.

I support the plans Plans preservation goals for the Sugarloaf Mountain area.

We must maintain the integrity of Sugarloaf Mountain and the historical civil war battlefield areas. That is why I'm in favor of holding the line of development at I270.

I oppose the last minute addition of the paragraph on page 54 opening the door to short-term Plan amendments because it creates an explicit opportunity for developers to quickly push for plan changes despite the more than two years of work and public input on the Sugarloaf plan.

I've said in previous letters that it's a slippery slope if the text is not rock solid on maintaining the boundary where it has been historically at I 270. I reject the text that leaves the door open for developers to amend the plan at a later time and want that idea or language taken out.

I urge all the County Council members to vote for the Sugarloaf plan with opposition to the text on page 54 that could allow for short term plan amendments.

I also support open and transparent government with the proper public input. I have written and emailed public comments and have been listening to most every single meeting for the last two years, with my focus on every single detail of this process.

I want to sincerely thank you for all the hard work that has gone into maintaining the Sugarloaf Plan as a Preservation Plan for the good of Frederick County's future.

I appreciate the opportunity to have my voice heard in the County and home that I love so dearly.

Subject: Sugarloaf Treasured Landscape Management Plan

[EXTERNAL EMAIL]

Hello:

I would like to thank the Frederick County Council for the opportunity to let me express these views.

My name is Paul Banas. I have lived in Urbana for close to 40 years, 38 to be exact. As the expression goes, the only thing constant is change. We have witnessed tremendous change in this area of the county, some good and some, well, perhaps less so.

While I am not anti-growth, I do almost fully support the Sugarloaf Treasured Landscape Management Plan for Frederick County. This plan helps balance all the change that has already taken place, especially over the last 25 years, and which continues to take place with a focus on the areas east of I-270. It is my hope the plan will help manage future change and preserve the rural, less developed nature of the areas west of I-270 for what they are today - a wonderful, beautiful and unique jewel not only for Frederick County but for the state of Maryland as well.

I would like to add that while I support the Sugarloaf Treasured Landscape Management Plan, I am opposed to the text on page 54, which allows for limited plan amendments. I believe this offers too easy an opportunity to scale back the scope and infringe upon the preservation aspect of the plan. I would suggest that this language be struck from the approved plan. The bar for potential future alterations to the plan should be set high to allow for maximum community input.

Thank you for your consideration and anticipated support of this critical plan for the future of Frederick County.

Respectfully,

Paul Banas

APPROVE THE SUGARLOAF PLAN

We, the undersigned call on the County Council to adopt the Planning Commission's recommended Sugarloaf Treasured Landscape Management Plan as a long-term land use management document.

- We support the Plan's long-term purpose of preserving the character of Sugarloaf Mountain, its surrounding area, and the precious natural resources of the region.
- We support the Plan's boundary as recommended to the Frederick County Council by the Frederick County Planning Commission in July 2022, which includes all the area to the west of I-270 from the Monocacy National Battlefield to the Montgomery County line. This boundary continues the County's commitment to its long-held delineation: intensive residential, commercial and industrial development should continue to be limited to the east of I-270, and the bucolic character of agricultural and conservation lands should continue to be preserved to the west of I-270.
- We support the application of the Overlay District within the entire boundary area in order to meet the county's long-range vision for the preservation and protection of the natural resources and rural landscape of the Sugarloaf Area and the vicinity of the nearby Monocacy National Battlefield.
- We oppose the language on page 54 of the draft Plan suggesting that amendments to the Plan boundary or Overlay may be made in the short-term. We support the Livable Frederick vision that County Council-approved Area Plans should guide Frederick County's long-term land use planning.

Subject: Comments on the Sugarloaf Overlay

Please see my comments. In the allowed three minutes, I couldn't offer all the things I'd have liked to say at your last meeting.

Best regards,

Nick Carrera; 2602 Thurston Rd, 21704

OVERLAY COMMENTS to the County Council August 15, 2022

from Nicholas Carrera, 2602 Thurston Road, Frederick 21704

The Sugarloaf Rural Heritage Overlay Zoning District, or "Overlay," is an important feature of the Sugarloaf Plan. By its "overlay" of limitations on land use it will help to achieve the goals and Vision of the Plan, as stated on page 53: "The Sugarloaf Treasured Landscape Management Plan contains policies and initiatives for the protection of the Planning Area's natural resources and the long-term health and integrity of the rural landscape. For these reasons, and to help achieve the Plan's Vision, the creation of a Sugarloaf Rural Heritage Overlay Zoning District is proposed ..."

It seems axiomatic that the Overlay should cover the entire area of the Plan. To exclude some areas is to retreat from the noble aims quote above. As Commissioner Hicks said at the February 9 meeting of the Planning Commission, "Ideally, the best solution is an Overlay that accomplishes the goals of the Plan, that could be applied to the entire planning area." Full coverage is also the simplest approach. It is easy to understand, treats all areas equally, and is therefore the most easily defensible. This was the approach chosen in the March 2022 draft of the Plan (Map 4-6, page 66).

Nevertheless, the "full Overlay" of the March 2022 draft Plan is not the one presented for County Council's consideration, in the July 2022 draft Plan. What happened to the earlier, ideal vision??

Prior to the June 15 Planning Commission meeting, the planning staff was apparently instructed to encourage the Commission to choose a limited Overlay. A specific, limited Overlay was depicted in the power point slides, and this formed the basis for discussion. Full coverage was mentioned as a “possibility,” as were other limited Overlays, but attention did not stray far from the Overlay that staff had prepared. This was ultimately accepted, and is depicted in the July 2022 draft (Map 4-6, page 65). Three properties are excluded: the Potomac Garden Center, the Kannavis Dispensary, and the Greenbriar pet hospital.

What reasons were given for the limited Overlay? Easiest to understand, although not the best reason, was that the owners had asked for it, as noted by Kimberly Brandt. Principal justification, however, was the expectation of a mass-transit hub at Urbana. (Urbana plans as early as 1972 talk of such a possibility, and the Livable Frederick Master Plan allows for the possibility of mass-transit running up the east side of I-270.) In discussion it was simply *assumed* that such a hub on the east side of I-270 would affect nearby areas on the west side of I-270 in some way. Just how would areas be affected? Would the transit hub actually *require* an exclusion from the Overlay? How large an area would be best: smaller than the three properties? larger than the three properties? or was exclusion of those three properties, as in *Goldilocks and the three bears*, “just right”?

None of these important questions was answered, but the Commissioners accepted the Overlay proposed by planning staff. If that stands, it leaves the Council and the county with a challenge.

If the present, limited Overlay is to be legally enacted, justification will be needed. But of necessity, this can be only weakly justified now. Can we know what will be needed so far in the future? Why this size exclusion from the Overlay no more, no less? Why not wait until mass-transit is actually built? Its effects on nearby property can then be precisely known, and needed changes made to the Sugarloaf Plan at that time. **Why not make a full Overlay now, and wait to see how it works out?**

End of comments.

Comments to the County Council Meeting on Sugarloaf Plan 8/15/22

My name is Johanna Springston and I live at 8101 Fingerboard Rd. and I offer the following comments for your consideration:

- I support the Sugarloaf Plan as currently drafted with the boundary at I-270, but suggest a few changes. I would like to see the preservation overlay extended over the entire area and I would like to see the language on p. 54 changed so that this Plan is a long-term one and not simply amended in a few years.
- For the past year, I have been participating in the public debate on the Sugarloaf Plan. I listened to last Thursday's meeting with great interest. I was glad to hear Councilmembers Hagan and McKay question the assumption that there will be an interchange at Parks Mill Rd. Such far-off and uncertain assumptions should not be a basis for decisions made today about this preservation plan.
- I was also encouraged to hear them question the language on p. 54 which suggests this Plan will be amended in a few years to accommodate the I-270 Corridor and Urbana Growth Area Plans. The Sugarloaf Plan should be adopted as a long-term preservation plan.
- To my surprise, I also heard a few callers saying that there is no development threat west of I-270 in the Sugarloaf area. I hope they were still listening when the developer who owns 600 acres called in and reiterated his desire to develop on the west side of I-270. Perhaps these callers are new to the process, but if they go back and read letters and listen to comments to the Planning Commission, they will find that the developer has been crystal clear in his intent to develop on the west side of I-270.
- I think the biggest issue concerning the Sugarloaf Plan is not government overreach. It is developer overreach. The developer, who has developed quite a bit on the east side of I-270, reached over 270 and bought land on the west side with the intent to develop it. He did this knowing full well that the County did not have plans to develop on the west side and that the County did not have plans to build infrastructure to support development on the west side.
- The biggest threat to the Sugarloaf Plan is development on the west side of I-270. If it is allowed, it will compromise the integrity of this preservation plan.
- There is plenty of space on the east side of I-270 to pursue economic development. There is apparently so much space that the developer changed the zoning on land that

was slated for economic development to housing. So, housing is being built on the south and north sides of the Rt. 80 interchange—the I-270 corridor.

- If economic development is so important in the I-270 corridor and at the interchange, why is housing being built there? And, I wonder what comments the State Department of Commerce would have offered to trading employment for more housing?
- I encourage the County Council not to buy into these fallacious arguments. Adopt the Sugarloaf Plan as a preservation plan that can endure for years to come.

Dolan, Mary

Council Members,

“When life feels too big to handle, go outside. Everything looks smaller when you’re standing under the sky.” L.R. Knost
More and more people are discovering the truth in this quote. I have been taking advantage of the beauty of the Sugarloaf area for over 40 years. It has been a grounding force in my life for decades. As time goes on, more people are coming to the Sugarloaf area to experience the beauty and to feel the same peace. Open space cannot be easily reclaimed once lost. Please consider the sacred quality of nature and preserve this area for future generations.

Thank you,
Margaret Kelley

Name	City	State	Postal Code	Country	Commented	Date	Comment
Ingrid Rosencrantz	Frederick	MD	21704	US	8/2/22	""I'm signing because Frederick County is under tremendous growth pressure and we need to preserve areas of significant environmental and cultural value - we have a chance to preserve the area around Sugarloaf and the Monocacy Battlefield. Please help us by signing the petition. Thanks!""	
Steve Black				US	8/2/22	""Save green space!!!Block industrialization""	
Gil Rocha	Poolesville	MD	20837	US	8/2/22	""To protect the Sugarloaf Mountain area's natural beauty.Gil Rocha- Dickerson MD""	
Eric Cronquist	Beallsville	MD	20839	US	8/2/22	""Preservation of agricultural land is more important to the residents of this area than intensive residential and commercial development.""	
Dj McGuinness	Mount Airy	MD	21771	US	8/2/22	""We can "pave paradise and put in a parking lot", or just leave paradise alone. Wild life is being choked onto the Highways and laying dead in the gutters. Enough urban spread, this is not "smart building", there are very few areas in Frederick County where high density building hasn't contributed to waste water runoff and flooding. Greed for some, decimates what's left of God's green earth. Enough already!""	
Kevin Firmin	Frederick	MD	21704	US	8/2/22	""I'd like to see a long term commitment to keep this area beautiful. Once one piece is cut out, the rest of the area will be primed for additional development in the minds of big developers. Keep this area safe from commercial development and the rich, greedy developers!""	
Alexandra Carrera	Frederick	MD	21704	US	8/2/22	""For environmental, historical, aesthetic reasons (among others) the area of Frederick County to the West of I-270, an historically protected area, significant to cyclists, horseback riders, naturalists and hikers from all over the DMV, as well as its resident homeowners and farmers, deserves to be protected as the treasure it is for generations to come.""	
Sharon Dooley	Frederick	MD	21701	US	8/3/22	""I support protections for the agricultural and conservation areas in the Sugarloaf plan. I oppose allowing loopholes such as are in paragraph 54 that would revisit this plan and might permit development on the western side of 270. Thanks for your foresight in this preservation""	
Moe Rosencrantz	Frederick	MD	21704	US	8/3/22	""I'm signing because I'm in the generation that's going to be inheriting this county when I'm older, and I want to come to adulthood in a county that has preserved the beauty of the sugarloaf area. And if someday I have kids of my own, I want them to be able to have the same experiences of nature and how lovely it is as I did when I was a child. Think about the next generation. Keep the line at 270.""	
John Carrera	Frederick	MD	21704	US	8/3/22	""I care about saving the natural beauty of our area. People need undeveloped spaces for their peace of mind and our survival depends on leaving ecosystems intact. Good urban planning means saying "no" to development sometimes. Montgomery County did it with the Ag. Preserve, Frederick County can do it, too!""	
Sue Trainor	Frederick	MD	21704	US	8/3/22	""There is lots of space already designated for development in Frederick County. Preserve our treasured landscapes and protect them from profit-motivated development creep. Money isn't the only measure of value.""	

Lorie Bacorn Burlington WV 26710 US 8/3/22 ""I grew up looking at Sugarloaf from our farm and all the farmland in the distance. When I go back to Urbana now I am disoriented by all the sprawl. It's so ugly. That sprawl had a lot to do with our family moving to WV on the late 70's. Please save the Sugarloaf area.""

Susan Eisendrath Rockville MD 20853 US 8/3/22 ""I support keeping Sugarloaf as natural as possible and to support biodiversity.""

Ann Knott Hinton WV 25951 US 8/3/22 ""I grew up on Parks Mills Rd. Although I've lived in WV since 1977, I have fond memories of Sugarloaf Mountain. I'm sitting on my porch as I write this looking at the mountains surrounding me and can't imagine them covered in homes. Preserve Sugarloaf for future generations to enjoy.""

Paul Wallick Frederick MD 21702 US 8/3/22 ""Sugarloaf should remain rural as possible.""

Barbara Schectman Frederick MD 21701 US 8/3/22 ""This is an area whose natural features are worth preserving.""

Karin Eckelmeyer Portola Valley CA 94028 US 8/3/22 ""This place was a treasure for us when I was growing up in the 40's and 50's.""

Linda Knott Hinton WV 25951 US 8/3/22 ""I'm signing because I grew up with the beautiful Sugarloaf Mountain in view from our farm. The landscape has changed so very much in the years since I've left, and enough is enough!""

Ann Andrex Union Bridge MD 21791 US 8/4/22 ""We need open spacePreserved""

Katharine Byron Middletown MD 21769 US 8/4/22 ""We use and enjoy the Sugarloaf area and encourage its preservation.""

Allie Taylor Poolesville MD 20837 US 8/4/22 ""This is an important plan that supports many county wide goals.""

Ann Connor Poolesville MD 20837 US 8/4/22 ""It is our duty to preserve and support open land green spaces and agricultural lands for current and future generations .We cannot get these back once gone or chipped away at by loopholes. It is up to us now to support the land that sustains us .""

Subject: Sugarloaf Preservation Plan workshop August 15, 2022. Phone and written comments

[EXTERNAL EMAIL]

Dear County Council Members,

Hi, my name is Pandora Gunsallus. My address is 3350 Parks Mill Road. I own about 25 acres of farmland near the corner of Route. 80 on Parks Mill Road. My land is part of a larger 366 acre farm, bought by my grandparents about 110 years ago.

I am writing to support the adoption of the Sugarloaf Treasured Landscape Management Plan as a long-term land use management document. I also support the plans purpose of preserving the unique character of Sugarloaf Mountain, its surrounding area, and the precious natural resources of the region. That is why I'm in favor of maintaining the I270 boundary from the Montgomery County line to the Monocacy River. I also support the application of the Overlay District within the entire boundary area in order to protect the rural landscapes and natural resources of the Sugarloaf area and the nearby Monocacy National Battlefield.

I oppose the language on page 54 of the draft plan, leaving the door open for amendments to the plan boundary or overlay.

I also support open and transparent government with the proper public input. Thank you to the Planning Commission for voting to restore the boundary back to I270. If planning for Frederick County is happening with out public input, chances are it's not the right plan to adopt for Frederick County.

Thank you, Pandora Gunsallus

241 Cynthia Drive, Canonsburg PA. 15317

Subject: RE: Suggested amendments on Overlay and PGC rezoning

On behalf of the County Council, thank you for your remarks on the Sugarloaf Area Plan. Council Members have all received your comments. Your comments will be part of the Council record.

Amendments can only be introduced by setting council members.

Have a good day.

Subject: Suggested amendments on Overlay and PGC rezoning

[EXTERNAL EMAIL]

Dear Council Members,

I've spoken strongly on the issues of the Overlay and the rezoning for the Potomac Garden Center. From what I recall, the Council decided that changes would only be made in response to specific amendment proposals. But I don't know if amendments could be offered by citizens, or only by Council Members.

Here are two suggested amendments. If I may propose them, consider it done. If I may not, then please consider them my suggestions, and perhaps one of you can propose them in my place.

Sincerely, and thanks for your consideration,

Proposed amendment regarding Overlay:

1. On page 53 of the July 2022 draft, in the second paragraph of the section on the zoning district, amend the 3rd sentence from the end to read as follows:

"For these reasons, and to help achieve the Plan's Vision, the creation of a Sugarloaf Rural Heritage Overlay Zoning District is proposed, **covering the entire area of the Sugarloaf Plan**, as shown on Map 4-6."

2. On page 65, replace Map 4-6 with the Map 4-6 on page 66 of the March 2022 draft Plan.

Proposed amendment regarding rezoning the Potomac Garden Center:

1. Table 1B, page 51: For the entry "General Commercial," change the figure in the "Proposed" column to 7.4, and the figure in the "Differential" column to zero. Alternatively, delete the entire entry for General Commercial.
2. Table 1D, page 52: make the same changes as those made in Table 1B.
3. Map 4-2a, page 61: Change red area for Potomac Garden Center to that in map 4-2, page 60.
4. Map 4-4, page 63: Change red area for Potomac Garden Center to that in map 4-3, page 62.

From: +17023541740

Message Transcription: Hello. My name is Stephanie Redwine and I live in Frederick county and I want to record my opposition to the Sugarloaf treasured landscape management plan. I would like for the council to review the plan and reject what is in the plan currently and revise it as needed. It looks like the landowners in the area would like this done as well. I am not a landowner, but I do live in Frederick county and, but definitely want to register my opposition. Thank you very much.

Position on the I-270 Technology Corridor, August 15, 2022

My name is Steve Poteat, I live on Sugarloaf Mountain Road. I think we need to answer the question—Where does the I-270 Technology Corridor exist? Is it both sides of I-270, west side or east side?

The developer lobbied State Department of Commerce comments on the Sugarloaf Plan suggest the I-270 corridor has high importance in the “biotechnology cluster” for the State.

But the I-270 Technology Corridor actually ends at Clarksburg in Montgomery County and for all practical purposes stops in Germantown. There is exactly ONE biotechnology firm from Germantown to Frederick a distance of 25 miles.

Let’s review the west side of I-270. Montgomery County has zoned all the land on the WEST side of I-270 from MD 121 to the county line in Hyattstown as Agriculture Reserve or very low residential density. In this area there are only rural roads, no public water and sewer and no public facilities with the exception of the Montgomery County Detention Center.

In Frederick County land on the WEST side of I-270 from the County line to the Monacacy Battlefield also is zoned low density residential and agriculture with only a two acre plant nursery zoned commercial.

This is clearly not the I-270 Biotechnology Corridor as envisioned by the State, or Frederick County or Montgomery County and mentioned in the Livable Frederick Master Plan.

There are biotechnology firms in Germantown. But along the EAST side of I-270 all the way to Frederick, a distance of 25 miles, there is

only one biotechnology firm. Kite Pharmaceuticals, has recently located a manufacturing facility in Urbana.

The remainder of the east side is dominated by a construction companies, heavy equipment parking, a building materials recycling plant, landscape companies, and two federal data centers. All of this is desirable employment but of course not biotechnology as the State desires.

In summary from Clarksburg north the I-270 Corridor only really exists on EAST side of I-270 between MD 355 and I-270.

You should note that the reduced amount of LACK of employment on the east of I-270 was compounded by the fact that Natelli Communities, citing the lack of demand for employment land, had rezoned 250 acres of employment land there, to residential.

That's 4 million square feet of employment development lost, and now Knowledge Farms in Urbana is asking to do the same.

All of this is compounded by the fact that the I-270 Corridor is not scheduled for any transit improvements in the foreseeable future. No transit, no transit oriented development in Urbana.

Let's keep development on the east side of I-270 where it can be managed.

August 15, 2022

Suggested changes to Draft STLMP pages 53 and 54

Urbana Community Growth Area

The County's Comprehensive Land Use map, the Livable Frederick Master Plan, and its Thematic Plan map all provide policy guidance for, and describe and depict, appropriate locations for future growth and development, as well as areas intended to retain rural qualities and protect natural landscapes. The Community Growth Area (CGA) boundary is a land use planning mechanism that establishes a finite geographical area where community infrastructure investments (schools, parks, roads, etc.) and public water and sewer service provision will be made. It signifies areas where zoning could be applied to facilitate efficient, compact development patterns and create vibrant neighborhoods. A CGA depicts preferential areas and locations for land use conversions to accommodate our housing, commerce, and employment needs, consistent with County policies and initiatives, and community goals.

The Urbana CGA borders the Sugarloaf Planning Area along I-270, which is **[DELETE currently]** a boundary that demarcates a large mixed-use (commercial, employment, residential) community from an area with dispersed residences, unique environmental and historic resources, and a distinctively rural sense of place; however, minor commercial development exists in the Sugarloaf Planning Area in the vicinity of the MD 80/I-270 interchange. The Urbana CGA embodies the characteristics of a typical CGA in Frederick County where population growth, public and private investments, and employment growth are focused and targeted. It contains four public schools, a library, a YMCA facility, a variety of housing types, plus numerous commercial services and businesses, including several in the biological and information technology sectors. These existing and planned employment, residential, commercial, and industrial land uses follow the entire east side of I-270, from just north of the existing Urbana community southward to the Montgomery County border. **[DELETE Programmed improvements to I-270 as part of the Op. Lanes Maryland project may influence and shape future planning for the Urbana Community Growth Area (refer to Chapter 5 for a more detailed narrative on the transportation network in and near the Sugarloaf Planning Area).]**

The long-range conceptual vision of the I-270 corridor as depicted in the LFMP's Thematic Plan includes transit service, mixed-use, and multi-modal development nodes at **[ADD: potential]** **[DELETE the future]** I-270 interchanges at Park Mills Road and Dr. Perry/Mott Roads, and at the existing MD 80 interchange. Achieving this future land use pattern will require inter-governmental coordination to establish transit, federal and State funding for design and construction of the potential interchanges, along with new planning initiatives, policy and regulatory evaluation, and legislative action at the local level.

The last comprehensive land use plan update and comprehensive rezoning in the Urbana area occurred in 2004, with the adoption of the Urbana Region Plan on June 24, 2004. Since then,

there has been considerable growth and development in the Urbana area and along the I-270 corridor. Recognizing this, the Livable Frederick Master Plan Implementation Program (October 2019) in its Planning Area Catalogue described an Elective Plan for a larger, thematically-conceived *Urbana Corridor* that could include a plan for the South Frederick Triangle, the Urbana Community Growth Area, or the I-270 Corridor. **[DELETE The scale and scope of future planning for the Urbana Community Growth Area or the I-270 corridor may determine the degree and extent of examination of lands within the Sugarloaf Planning Area, if any, and may result in a limited plan amendment to the Sugarloaf Treasured Landscape Management Plan. The South Frederick Triangle has now been incorporated into the South Frederick Corridors Plan.]**

(Add the following para)

“The scale and scope of future planning for the Urbana Community Growth Area or the I-270 corridor should minimize any impact on the Sugarloaf Treasured Landscape. Any proposed changes to transportation or land use plans in neighboring growth areas must be assessed with full attention to the preservation objectives of the Sugarloaf Treasured Landscape Management Plan. Any future I-270 plan or Urbana plan should be crafted to minimize their impact on the natural resources and rural character of the Sugarloaf region. Multimodal development, as envisioned by Livable Frederick is contingent on available mass transit. To achieve and secure the objectives of STLMP, the multimodal development envisioned in LFMP should be constrained by I-270 and occur only to the East of the interstate.”

AND... (on Page 72)

Policy 5.2 Future transit centers, park-and-ride facilities, and transit-oriented development projects associated with future interchanges on I-270 should be thoroughly evaluated in order to **[ADD: minimize impact on the Sugarloaf Treasured Landscape, and]** serve the Urbana Community Growth Area, as well as potential points along the I-270 Corridor that may support compact employment and mixed-use development.
